**DETAILED ACTION**

***Response to Arguments***

1. As to claim 1, Applicant's arguments filed March 18, 2004 have been fully considered but they are not persuasive.

As to claim 1, Applicant argues that prior art of record fails to teach or fairly suggest determining constant background intensity responsive to least squares fit.

The Examiner disagrees. Patton discloses least squares image in Fig.5, and a 7 by 7 least squares best fit template for reducing noise (see page 70, Fig.5).

Subsequently in page 71 Patton teaches background determination by using a frequency histogram for different region and a Gaussian curve is fitted to low intensity for each histogram. The frequency maximum of the curve is used as the background value (see page 71, 5.1- 5.2).

As to claims 7, 17 and 19, Applicant's argument is persuasive see Applicant's Remarks page 8, lines 13-19 filed March 18, 2004. Therefore, the rejection has been withdrawn.

As to claim 11, Applicant's argument is persuasive see Applicant's Remarks page 9, lines 3-6 filed March 18, 2004. Therefore, the rejection has been withdrawn.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being by Wayne F. Patton (Biologist's perspective on analytical imaging systems as applied to protein gel electrophoresis). Applicant's admitted prior art.

As to claim 1, Patton discloses a method of determining a background intensity an image comprising; selecting a plurality of spots within the image falling within a least squares curve fit (see page 71, paragraph 5.1. background determination, lines 1- 10); determining constant background intensity for the spots within the curve fit (see page 71, paragraph 5.1. background determination, lines 1- 10).

***Allowable Subject Matter***

4. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-21 are allowed.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
